

BPL is still a flawed technology and a wide spectrum of consumers will be negatively impacted by it's implantation. Will the government augment or re mediate electronic devices in homes and businesses which cease to function or are seriously degraded in their function due to the sharp rise of BROADBAND INTERFERENCE? There are already laws on the books that prohibit such interference yet the FCC is allowing, even encouraging the breaking of their own laws. Oh yes, the government calls this de-regulation! Once again, one step forward, two steps back.
